Respiratory virus surveillance report for the week ending December 24, 2011, week 11-51

AT-A-GLANCE

- Respiratory viruses identified this week :
  rhinovirus/enterovirus, RSV and influenza (A/H3) are predominant.

- Influenza-like illness (ILI) activity for this week

Wisconsin	Low
Wisconsin (CDC level)	Minimal
Western Region	Low
Northern Region	Low
Northeastern Region	Low
Southeastern Region	Moderate
Southern Region	Low

- ILI activity in Region V of the U.S. (WI, MN, IL, MI, OH, IN) is below baseline levels

- ILI activity in the U.S. is below baseline levels

- The Predictive Value Positive (PVP) for rapid influenza tests is: low
  (PVP is the probability of disease in a patient with a positive test result)

- The Predictive Value Negative (PVN) for rapid influenza tests is: high
  (PVN is the probability of not having disease when the test result is negative)

- Influenza-associated pediatric deaths (October 8, 2011-present)

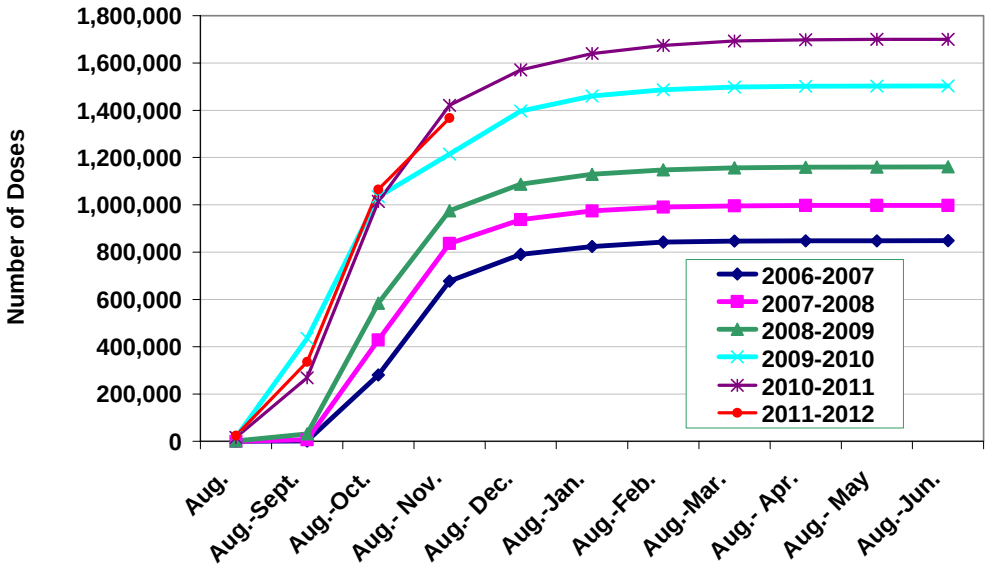
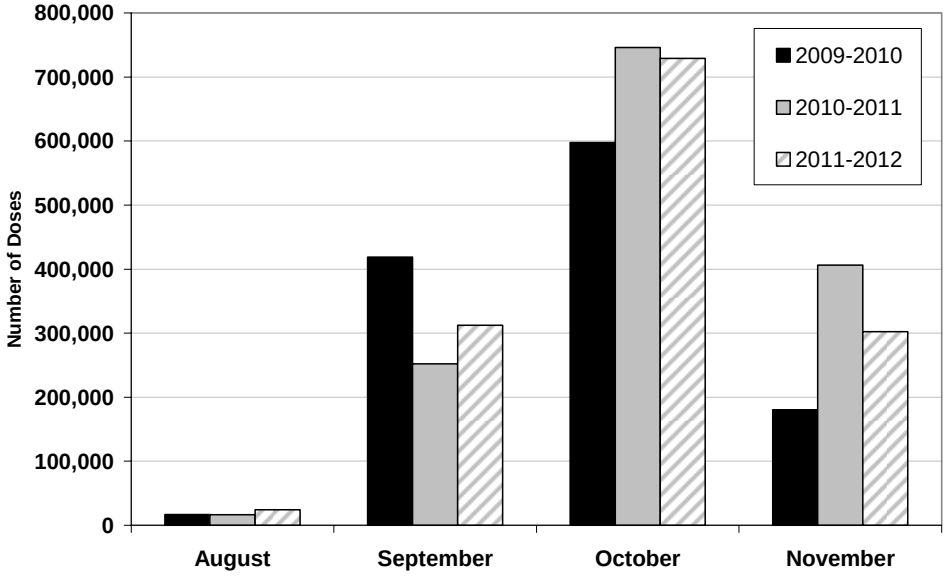
Seasonal Influenza Vaccination in Wisconsin
Based on doses reported to the Wisconsin Immunization Registry (WIR)

Cumulative Doses of Seasonal Influenza Administered and Reported to the WIR, 2006-2012 Influenza Seasons



Data source: WIR
Data as of 12.15.11

Number of Doses of Seasonal Influenza Vaccine Administered and Reported to the WIR, by Month for Influenza Seasons 2009-2012



*Data source: WIR,
2011 data as of 12.15.11

- These graphs include only doses of seasonal influenza vaccine administered and reported to the Wisconsin Immunization Registry (WIR).

- Data for 2011-2012 season is incomplete because of the expected lag between the vaccine administration date and the date reported to the WIR, which may be a short as one day or as long as several months, depending on the submitter. Therefore, the current season's data will be adjusted as additional data is received.
- While use of the WIR is not mandatory, the WIR receives data from a variety of sources, including health care providers, health maintenance organizations, local health departments and tribal health centers/clinics, schools and pharmacies.
- For additional information regarding the immunization data, please contact Stephanie Schauer, epidemiologist, with the Wisconsin Immunization Program at (608) 264-9884.
